

Falls Are The Number One Cause Of Senior Injuries

Introducing our Honeywell / 2GIG compatible Fall Sensor

When a sudden fall occurs it may be difficult to reach the phone or simply press a medical alert button to call for help. About half of elderly people who fall cannot get up without help. Remaining on the floor for greater than 2 hours after a fall increases risk of dehydration, pressure ulcers, rhabdomyolysis, hypothermia, and pneumonia. This **unique** Fall Sensor integrates two different sensors and has the ability to accurately differentiate a fall from an accidental movement or bump of the pendant.

Increase monthly account revenue - No New PERS consoles or base stations needed!

Communicates directly with existing Honeywell & 2GIG brand security panels

BENEFITS

- Light-weight pendant
- Replaceable battery
- Battery operated with life expectancy of over 2 years in a typical domestic environment*
- Ultra low power consumption
- Water Resistant design
- Breakaway Lanyard
- Smallest fall sensor on the market

**Battery life is calculated at an average of one call placed per day.*

TECHNICAL SPECIFICATIONS

- Signal Range: 600+ feet in open range
- Battery life: 2 years or over* (Replaceable)
- Dimensions: 58.6 x 42 x 19mm
- Operating temperature: -10° to 40°C
- Humidity: up to 90% non-condensing
