This manual may contain several technical incorrect places or printing errors, and the content is subject to change without notice. The updates will be added to the new version of this manual. We will readily improve or update the products or procedures described in the manual.

Regulatory Information

FCC Information

Please take attention that changes or modification not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC compliance: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

FCC Conditions

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- 1. This device may not cause harmful interference.
- 2. This device must accept any interference received, including interference that may cause undesired operation.

EU Conformity Statement

 ϵ

This product and - if applicable - the supplied accessories too are marked with "CE" and comply therefore with the applicable harmonized European

standards listed under the Low Voltage Directive 2014/35/EU, the EMC Directive 2014/30/EU, the RoHS Directive 2011/65/EU.

2012/19/EU (WEEE directive): Products marked with this symbol cannot be disposed of as unsorted municipal waste in the European Union. For proper recycling, return this product to your local supplier upon the purchase of equivalent new

equipment, or dispose of it at designated collection points. For more information see: www.recyclethis.info. 2006/66/EC (battery directive): This product contains a

battery that cannot be disposed of as unsorted municipal waste in the European Union. See the product documentation for specific battery information. The battery is marked with this symbol, which may

include lettering to indicate cadmium (Cd), lead (Pb), or mercury (Hg). For proper recycling, return the battery to your supplier or to a designated collection point. For more information, see: www.recyclethis.info.

Industry Canada ICES-003 Compliance

This device meets the CAN ICES-3 (A)/NMB-3(A) standards requirements.

Warning

This is a class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.

Safety Instruction

These instructions are intended to ensure that user can use the product correctly to avoid danger or property loss.

The precaution measure is divided into "Warnings" and "Cautions".

Warnings: Serious injury or death may occur if any of the warnings are neglected.

Cautions: Injury or equipment damage may occur if any of the cautions are neglected.

Warnings Follow	Cautions Follow these
these safeguards to	precautions to prevent
prevent serious injury	potential injury or

material damage.

Warnings

or death.

- In the use of the device, you must be in strict compliance with the electrical safety regulations of the nation and region.
- Input voltage should meet both the SELV (Safety Extra Low Voltage) and the Limited Power Source with 12 VDC according to the IEC60950-1 standard. Refer to
- technical specifications for detailed information.

 Do not connect multiple devices to one power adapter to avoid over-heating or a fire hazard caused
- by overload.Make sure that the plug is firmly connected to the
- power socket.

 Make sure that the device is firmly fixed if wall
- mounting or ceiling mounting is adopted.
 If smoke, odor or noise rise from the device, turn off the power at once and unplug the power cord, and then contact the service center.
- Never attempt to disassemble the camera by unprofessional personal.

Cautions

- Do not drop the camera or subject it to physical shock.
- Do not touch senor modules with fingers.
- Do not place the camera in extremely hot, cold (the operating temperature shall be -40°C to 60°C), dusty or damp locations, and do not expose it to high electromagnetic radiation.
- If cleaning is necessary, use clean cloth with a bit of ethanol and wipe it gently.
- Do not aim the camera at the sun or extra bright places.
- The sensor may be burned out by a laser beam, so when any laser equipment is in using, make sure that the surface of sensor will not be exposed to the laser beam.
- Do not expose the device to high electromagnetic radiation or extremely hot, cold, dusty or damp environment.
- To avoid heat accumulation, good ventilation is required for the operating environment.

- Keep the camera away from liquid while in use for non-water-proof device.
- While in delivery, the camera shall be packed in its original packing, or packing of the same texture.

1 Introduction

1.1 Product Features

The main features are as follows:

- High performance CMOS sensor
- IR cut filter with auto switch
- OSD menu with configurable parameters
- Auto white balanceSMART IR
- Strobe light alarm
- Alarm out
- PIR detection
- 3-axis adjustmentAlarm linkage with DVR

1.2 Overview

This manual applies to two types of the bullet camera. The overviews of each type are shown in the figures below.

1.2.1 Overview of Type I Camera

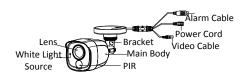

Figure 1-1 Overview of Type I Camera

1.2.2 Overview of Type II Camera

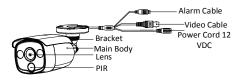

Figure 1-2 Overview of Type II Camera Installation

2 Installation

Before you start

- Make sure that the device in the package is in good condition and all the assembly parts are included.
- Make sure that all the related equipment is power-off during the installation.
- Check the specification of the products for the installation environment.
- Check whether the power supply is matched with your power output to avoid the damage.

- Make sure the wall is strong enough to withstand three times the weight of the camera, and the mount.
- If the wall is cement, insert expansion bolts before installing the camera. If the wall is wooden, use self-tapping screws to secure the camera.
- If the product does not function properly, contact your dealer or the nearest service center. Do NOT disassemble the camera for repair or maintenance by yourself.

2.1 Installation of Type I Camera

2.1.1 Ceiling/Wall Mounting without Junction Box

Steps:

- Paste the drill template (supplied) to the place where you want to install the camera.
- Drill the screw holes and the cable hole (optional) in the ceiling/wall according to the drill template.

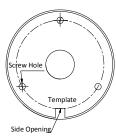

Figure 2-1 Drill Template

Note:

Drill the cable hole, when adopting the ceiling outlet to route the cable.

 Attach the bracket to the ceiling/wall, and secure the camera with supplied screws.

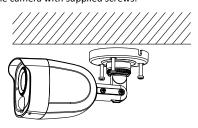

Figure 2-2 Fix the Camera to the Ceiling

Note:

- The supplied screw package contains self-tapping screws, and expansion bolts.
- For cement wall/ceiling, expansion bolts are required to fix the camera. For wooden wall/ceiling, self-tapping screws are required.
 Route the cables through the cable hole, or the sign
- Route the cables through the cable hole, or the side opening.
- Connect the corresponding power cord, and video cable.
- Power on the camera to check whether the image on the monitor is gotten from the optimum angle. If not, adjust the camera according to the figure below to get an optimum angle.

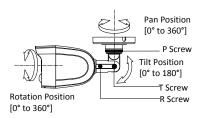

Figure 2-3 3-axis Adjustment

- Loosen the P screw to adjust the pan position [0° to 360°]. Tighten the screw after completing the adjustment.
- Loosen the T screw to adjust the tilt position [0° to 180°]. Tighten the screw after completing the adjustment.
- Loosen the R screw and rotate the camera [0° to 360°]. Tighten the screw after completing the adjustment.

2.1.2 Ceiling/Wall Mounting with Junction Box

Before you start:

You need to purchase a junction box separately. **Steps:**

- Paste the drill template on the ceiling/wall.
- Drill screw holes and the cable hole in the ceiling/wall according to the holes of the drill template.

Figure 2-4 Drill Template of Junction Box

- Take apart the junction box, and align the screw holes of the camera with those on the Junction box' cover.
- 4. Install the camera on the junction box's cover with supplied screws.

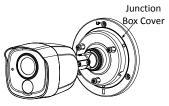

Figure 2-5 Install the Camera on the Junction Box's Cover

- Attach the junction box body to the ceiling/wall by aligning the screw holes of the junction box.
- Secure the junction box's body on the ceiling/wall with supplied screws.

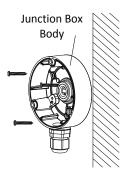

Figure 2-6 Secure the Junction Box to the Wall/Ceiling

- Route the cables through the bottom cable hole, or the side cable hole of the junction box.
- 8. Combine the junction box cover with its body.

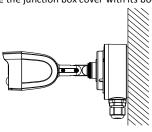

Figure 2-7 Combine the Junction Box Cover back to its

Body

 Repeat the step 5 and 6 of 2.1.1 Ceiling/Wall Mounting without Junction Box to complete the installation.

2.2 Installation of Type II Camera

2.2.1 Ceiling/Wall Mounting without Junction Box Steps:

- Paste the drill template (supplied) to the place where you want to install the camera.
- Drill the screw holes according to the drill template, and the cable hole (optional) on the ceiling.

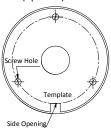

Figure 2-8 Drill Template

Note:

Drill the cable hole in the center of the drill template, when adopting ceiling outlet to route the cable.

- Route the cables through the cable hole (optional) or the side opening.
- Install the camera to the ceiling with supplied screws.

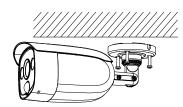

Figure 2-9 Install the Camera to the Ceiling

Note:

- The supplied screw package contains self-tapping screws, and expansion bolts.
- For cement wall/ceiling, expansion bolts are required to fix the camera. For wooden wall/ceiling, self-tapping screws are required.
- Connect the corresponding power cord, and video cable.
- Power on the camera to check whether the image on the monitor is gotten from the optimum angle. If not, adjust the surveillance angle.

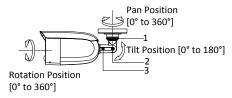

Figure 2-10 3-Axis Adjustment

- Loosen the No.1 adjusting screw to adjust the pan position [0° to 360°]. Tighten the No.1 adjusting screw.
- Loosen the No.2 adjusting screw to adjust the tilting position [0° to 180°]. Tighten the No. 2 adjusting screw.
- Loosen the No.3 adjusting screw to adjust the rotation position [0° to 360°]. Tighten the No.3 adjusting screw.

2.2.2 Ceiling/Wall Mounting with Junction Box

Before you start:

You need to purchase a junction box separately. **Steps:**

- Paste the drill template on the ceiling/wall.
- Drill screw holes and the cable hole (optional) in the ceiling/wall according to the holes of the drill template.

Figure 2-11 Drill Template

Note:

Drill the cable hole, when adopting ceiling outlet to route the cable.

- 3. Take apart the junction box, and align the screw holes of the bullet camera with those on the Junction box's cover.
- 4. Install the camera on the junction box's cover with supplied screws.

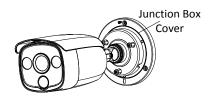

Figure 2-12 Install the camera on the Junction Box

- 5. Secure the junction box's body on the ceiling/wall. with supplied screws.
- Route the cables through the bottom cable hole, or 6. the side cable hole of the junction box. 7. Combine the junction box cover with its body with

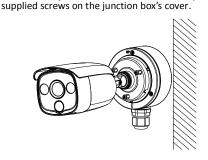

Figure 2-13 Combine the Junction Box's Cover with its Body

Repeat the step 5 and 6 of 2.2.1 Ceiling/Wall Mounting without Junction Box to complete the installation.

3 Menu Description

Please follow steps below to call the menu. NOTE:

Menu description part is only for your reference. It might have some differences due to the specific model that you have.

Steps:

2.

Connect the camera with the TVI DVR, and the monitor, shown as the figure 3-1.

Figure 3-1 Connection

- Power on the analog camera, TVI DVR, and the monitor to view the image on the monitor.
- 3. Click PTZ Control to enter the PTZ Control interface.
 - Call the camera menu by clicking abutton, or call the preset No. 95.

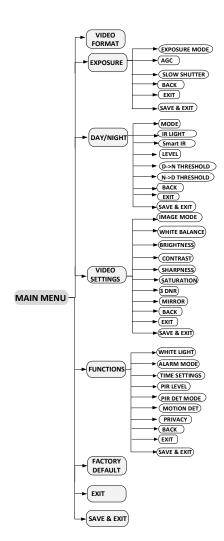

Figure 3-2 Main Menu Overview

- 5. Click the direction arrow to control the camera.
 - Click up/down direction button to select the item.
 - 2). Click Iris + to confirm the selection.
 - 3). Click left/right direction button to adjust the value of the selected item.

3.1 VIDEO FORMAT

You can select the video format as 2MP@25fps, 2MP@30fps, 4MP@25fps, 4MP@30fps, or 5MP@20fps.

Note:

4MP@25fps, 4MP@30fps, or 5MP@20fps are only available for HOT series.

3.2 EXPOSURE

EXPOSURE MODE

You can set the **EXPOSURE MODE** as **GLOBAL**, **BLC**, **HLC**, or **WDR**.

GLOBAL

GLOBAL refers to the normal exposure mode which adjusts lighting distribution, variations, and non-standard processing.

BLC (Backlight Compensation)

BLC (Backlight Compensation) compensates light to the object in the front to make it clear, but this may cause the over-exposure of the background where the light is strong.

HLC (Highlight Compensation)

HLC stands for highlight compensation. The camera detects the strong spots (the over-exposure portion of image), then reduce the brightness of the strong spots to improve the overall images.

WDR (Wide Dynamic Range)

The wide dynamic range (WDR) function helps the camera provide clear images even under back light circumstances. When there are both very bright and very dark areas simultaneously in the field of view, WDR balances the brightness level of the whole image and provide clear images with details.

AGC (Auto Gain Control)

It optimizes the clarity of the image in poor light conditions. The **AGC** level can be set as **HIGH**, **MEDIUM**, or **LOW**.

Note:

The noise will be amplified when the AGC is on.

SLOW SHUTTER

SLOW SHUTTER increases the exposure time on a single frame, which makes a camera more sensitive to the light so it can produce images even in low lux conditions.

You can set the **SLOW SHUTTER** function as OFF, x2, x4, x6, x8, x10, x12, x14, or x16 according to the different light conditions.

3.3 DAY/NIGHT

COLOR, B&W (Black White), and **AUTO** are selectable for DAY and NIGHT switches.

COLOR

The image is colored in day mode all the time.

B/W

The image is black and white all the time, and it is better to turn the IR LIGHT on in poor light conditions.

IR LIGHT

You can turn on/off the **IR LIGHT** to meet the requirements of different circumstances.

SMART IR

The **Smart IR** function is used to adjust the light to its most suitable intensity, and prevent the image from over exposure. You can choose **MODE 1** or **MODE 2**. **MODE 1** could reach the most ideal effects of the low illumination, but it might cause a delay by contrast with the actual scenario. **MODE 2** represents the normal mode. The **SMART IR** value can be adjusted from 0 to 3. The greater the value is, the more obvious effects are.

AUTO

You can turn on/off the IR LIGHT, and set the value of SMART IR in this menu.

DAY NIGHT		
MODE IR LIGHT SMART IR LEVEL D-N THRESHOLD N-D THRESHOLD BACK EXIT SAVE&EXIT	AUTO > ON > MODE 2> 2> 2> 12> 17> 4	

Figure 3-3 DAY NIGHT

You can turn on/off the infrared to meet the requirements of different circumstances.

SMART IR

IR LIGHT

The **Smart IR** function is used to adjust the light to its most suitable intensity, and prevent the image from over exposure. You can choose **MODE 1** or **MODE 2**. **MODE 1** could reach the most ideal effects of the low illumination, but it might cause a delay by contrast with the actual scenario. **MODE 2** represents the normal mode. The **SMART IR** value can be adjusted from 0 to 3. The greater the value is, the more obvious effects are.

D-N THRESHOLD (Day to Night Threshold)

Day to Night Threshold is used to control the sensitivity of switching the day mode to the night mode. You can set the value from 1 to 9. The larger the value is, the more sensitive the camera is.

N-D THRESHOLD (Night to Day Threshold)

Night to Day Threshold is used to control the sensitivity of switching the night mode to the day mode. You can set the value from 1 to 9. The larger the value is, the more sensitive the camera is.

3.4 VIDEO SETTINGS

Move the cursor to **VIDEO SETTINGS** and click Iris+ to enter the submenu. **WHITE BALANCE**, **BRIGHTNESS**, **CONTRAST**, **SHARPNESS**, **SATURATION**, **3 DNR**, and **MIRROR** are adjustable.

VIDEO SETTINGS		
IMAGE MODE WHITE BALANCE BRIGHTNESS CONTRAST SHARPNESS SATURATION 3DNR MIRROR BACK EXIT SAVE & EXIT	STD > 1 5 >	

Figure 3-4 VIDEO SETTING

IMAGE MODE

IMAGE MODE is used to adjust the image saturation, and you can set it as **STD** (Standard), or **HIGH-SAT** (High Saturation).

WHITE BALANCE

White balance, the white rendition function of the camera, is to adjust the color temperature according to the environment. It can remove unrealistic color casts in the image. You can set WHITE BALANCE mode as AUTO, or MANUAL.

AUTO

Under AUTO mode, white balance is being adjusted automatically according to the color temperature of the scene illumination.

MANUAL

You can set the **R-GAIN/B-GAIN** value to adjust the shades of red/blue color of the image.

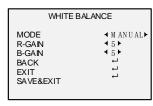

Figure 3-5 MWB MODE

BRIGHTNESS

Brightness refers to the brightness of the image. You can set the brightness value from 1 to 9 to darken or brighten the image. The greater the value is, the brighter the image is.

CONTRAST

This feature enhances the difference in color and light between parts of an image. You can set the **CONTRAST** value from 1 to 9.

SHARPNESS

Sharpness determines the amount of detail an imaging system can reproduce. You can set the **SHARPNESS** value from 1 to 9.

SATURATION

Adjust this feature to change the saturation of the color. The value ranges from 1 to 9.

3 DNR (3D DNR)

3 DNR refers to 3D digital noise reduction. Comparing with the general 2D digital noise reduction, the 3D digital noise reduction function processes the noise between two frames besides processing the noise in one frame. The noise will be much less and the video will be clearer.

MIRROR

OFF, H, V, and HV are selectable for mirror.

OFF: The mirror function is disabled.

H: The image flips 180° horizontally.

V: The image flips 180° vertically.

HV: The image flips 180° both horizontally and vertically.

3.5 FUNCTIONS

WHITE LIGHT

In the WHITE LIGHT mode, you can set the mode as AUTO or OFF.

ALARM MODE

In the ALARM MODE, you can select the ALARM MODE as SOLID, or FLASHING.

FUNCTIONS		
WHITE LIGHT	♦OFF	
ALARM MODE	◆FLASHING▶	
TIME SETTINGS	∢ 10S⊁	
PIR LEVEL	43 →	
PIR DET MODE	◆ OUTDOOR	
MOTION DET	← →	
PRIVACY	← →	
BACK	← →	
EXIT	← →	
SAVE & EXIT	4← →	

Figure 3-6 FUNCTIONS

SOLID

Select the ALARM MODE as SOLID. In this way, the white light source turns on, when the PIR module received the alarm signal.

FLASHING

Select the ALARM MODE as FLASHING. In this way, the white light source flashes when the PIR module received the alarm signal.

Note:

When the WHITE LIGHT is selected as AUTO, you can only select the ALARM MODE as FLASHING.

TIME SETTINGS

In the TIME SETTINGS you can set the time as 5 s, 10 s, 15 s, 30 s, or 60 s, which means that the solid mode stays for the set time when the camera received one alarm signal.

Note: The solid mode will be stayed for another set time when second alarm signal is received, and the rest can be done in the same way.

PIR LEVEL

Adjust the sensitivity of the PIR module, and the higher the value is, the more sensitive the PIR module is.

PIR DET MODE

OUTDOOR and **INDOOR** are selectable for PIR DET MODE switch.

MOTION DET

You can turn on/off the MOTION DET to meet different circumstances.

PRIVACY

You can turn on/off the PRIVACY to meet different circumstances.

3.6 FACTORY DEFAULT

Reset all the settings to the factory default.

3.7 EXIT

Move the cursor to EXIT and click Iris+ to exit the menu.

3.8 SAVE & EXIT

Move the cursor to SAVE & EXIT and click Iris+ to save the settings, and exit the menu.
