

MAX® HDMI Adapter Extender Cable

The Siemon MAX HDMI Adapter Extender Cable offers an easy pass-through connection for extending cables from LCD projectors, monitors and smart screens to an HDMI interface mounted in a Siemon MAX series faceplate. It features a female HDMI MAX connector on one end that is compatible with Siemon MAX series faceplates or modular furniture adapters and a short pigtail to a standard female HDMI connector on the other end. The HDMI Adapter Extender Cable is ideal for use in conference rooms, classrooms or any space requiring an easily accessible interface for connecting laptops, DVRs or other video controllers to ceiling or wall-mounted displays.

Space Savings – Pigtail extends the HDMI connection outside of the outlet box, eliminating management and bend radius concerns associated with thicker HDMI cables

Modular Interface – Female HDMI MAX connector fits into a single 2-port opening in a MAX series faceplate or modular furniture adapter

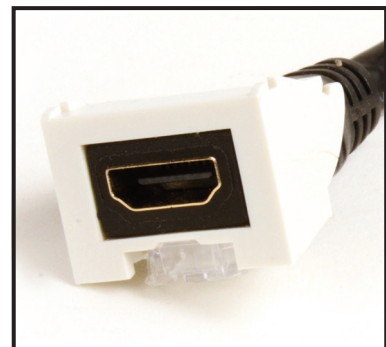

Standard-based Design – Supports HDMI V1.3 application for transferring uncompressed video and audio from HDMI-compliant sources.

Versatile Mounting – Mounts in either a flat or angled position for easy access and can be mixed with other Siemon MAX or Z-MAX® outlets

Front Installation – Installs from the front of the faceplate for easier deployment without faceplate removal

High Quality Connection – Supports a low loss signal for 720p or 1080p HD video

Ordering Information

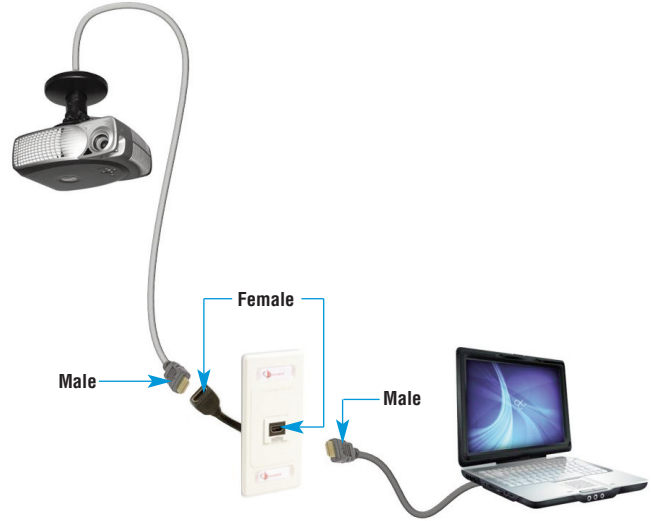

Part #	Description
MX-HD-XX	MAX® HDMI Adapter Extender Cable, F/F

Use (XX) to specify bezel color: 01=Black, 02 = White, 20 = Ivory, 25 = Bright white, 80 = Light Ivory, 82 = Alpine White
